REQUEST FOR FILING RECEIPT CORRECTION

Hon. Commissioner of Patents and Trademarks,

Sir:

Undersigned counsel has received the Filing Receipt for the above-identified application.

However, the priority information was listed incorrectly and should be as follows:

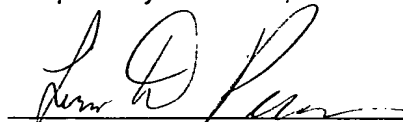

- **THIS APPLN IS A CON OF PCT/DE02/00171 January 21, 2002**

The foreign application information was listed incorrectly and should be as follows:

- **GERMANY 101 02 725.7 January 22, 2001**

It is respectfully requested that the Patent Office Records be changed and that a new Filing Receipt be issued, so that the printed patent will show the correct priority and foreign application information.

Respectfully submitted,

LOREN DONALD PEARSON
REG NO. 42,987

Enclosed: Copy of the Filing Receipt
Copy of the first page of the Declaration
Copy of the first page of the Specification

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

5 Cross-Reference to Related Application:

This application is a continuation of copending International Application No. PCT/DE02/00171, filed January 21, 2002, which designated the United States and was not published in English.

10 Background of the Invention:

Field of the Invention:

The invention relates to a method for operating a PLL frequency synthesis circuit for a TDMA/FDMA data transmission device.

15

Time division multiple access (TDMA) methods and frequency division multiple access (FDMA) methods are multiple access methods that are used in a large number of data transmission systems (cordless telephony, data interchange between

20 computers and peripherals, etc.). TDMA is based on the subdivision of the time into time slots, which are then used for interchanging data in portions between terminals (for example base stations and mobile stations). FDMA is analogous to TDMA in the frequency domain, that is to say it relates to
25 the subdivision of the overall transmission bandwidth into
